

MD. MANIK ULLAH

FULL STACK SOFTWARE DEVELOPER

Portfolio | manikullah.me@gmail.com | +91 9201163155 | github.com/sheikhmanik | linkedin.com/in/sheikhm01

CAREER SUMMARY

Full-Stack Software Developer with hands-on production experience building scalable SaaS products end-to-end — API design, DB schema, and responsive frontends. Sole engineer on two shipped products used by 50–100 active users at a restaurant-tech company. Founded RenewHQ, a membership SaaS with early users onboard. Fluent in the modern TypeScript ecosystem: Next.js, React, Node.js, Prisma, PostgreSQL. Available immediately.

WORK EXPERIENCE

Full Stack Software Developer | Possier in Chennai, India (Remote) Aug 2025 – Dec 2025

Led development of two full-stack products at a restaurant management SaaS (POS, CRM, inventory, online ordering).

- Built the **Website Builder** end-to-end — drag-and-drop no-code tool enabling **50–100 restaurant owners** to launch custom websites. Engineered layout engine, theme system, metadata management, and live preview.
- Sole engineer on **Invoicing Software** — owned the full stack: REST API design, PostgreSQL schema, Prisma ORM, Fastify/Node.js backend, and Next.js frontend. Actively used by Possier's client base.
- Collaborated in a 2-person team; made independent backend architecture and DB schema decisions on the invoicing module.

Tech: TypeScript, Next.js, React.js, Node.js, Fastify, ExpressJS, PostgreSQL, Prisma, Supabase, TailwindCSS, Git

Founder & Full Stack Developer | RenewHQ in Bhilai, CG, India (Remote) 2026 – Present

Self-founded SaaS to solve a real gap: gyms, coaches, and subscription businesses lack simple renewal tracking tools.

- Designed and built RenewHQ solo — full product ownership from concept to deployment. Onboarded **~10 early members** within weeks of launch.
- Handles member tracking, expiry management, and renewal recovery workflows. Currently in active beta.

Tech: Next.js, TypeScript, React.js, PostgreSQL, Prisma, TailwindCSS

Front-End Web Developer | Koala Customer Care Vancouver, BC, Canada (Remote) May 2023 – Oct 2023

- Started as a freelancer on Upwork; promoted to full-time Frontend Developer after demonstrating consistent quality.
- Built responsive UI components and implemented Photoshop mockup-to-code for client-facing interfaces.

Tech: HTML5, CSS3, JavaScript, Photoshop

PROJECTS

Website Builder · fuvii.com/website-builder/demo

Built at Possier — drag-and-drop no-code website builder enabling 50–100 restaurant owners to create and customize their own business websites. Engineered dynamic layout engine, theme system, metadata management, and live preview end-to-end.

Tech: Next.js, TypeScript, React.js, TailwindCSS

Invoicing Software · invoicing-lac.vercel.app

Production invoicing app built at Possier. Full ownership of API design, DB schema, Fastify backend, Next.js frontend. Dynamic line items, invoice export, real-time data handling.

Tech: Next.js, Fastify, Node.js, PostgreSQL, Prisma, Supabase

GRC Compliance Platform · vizgrc.vercel.app

Fiverr client project — architected full backend: asset mgmt, risk tracking, multi-framework compliance, RBAC with audit logging. Delivered frontend improvements on top of client-provided UI.

Tech: Next.js, TypeScript, Node.js, PostgreSQL, Prisma

SKILLS

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, TailwindCSS, HTML5, CSS3

Backend: Node.js, Express.js, Fastify, REST API Design, System Design

Databases: PostgreSQL, Prisma ORM, Supabase

DevOps: Docker, Containerisation, AWS (S3, EC2), Cloudinary

Tools: Git, GitHub, NPM, Vite, VS Code

EDUCATION

B.Tech. in Computer Science & Engineering · Chhattisgarh Swami Vivekanand Technical University · 2023 – 2026 (Expected)
